

Installing the Investigating Search Interface extension

A short guide to set up before our first meeting

This explains how to install the project's browser extension on your own laptop before we meet. If you are able to set it up in advance, that is helpful, but please do not worry if you cannot, or if something does not work. We will go through it together at the start of our meeting. It usually takes about ten minutes.

Before you start

- You will need the Google Chrome browser.
- Please keep the extension folder somewhere permanent, such as a new folder inside your Documents. If it is later moved or deleted, the extension stops working.

Installing it

1. Save the attached folder and unzip it somewhere it can stay (a new 'Investigating Search' folder in Documents is ideal). Note where you have put it.
2. Open Chrome, type **chrome://extensions** into the address bar, and press Enter.
3. Turn on **Developer mode** using the toggle in the top right.
4. Click **Load unpacked** in the top left.
5. Select the unzipped folder (the one that contains **manifest.json**) and confirm.
6. You should see **Investigating Search Interface** appear in your list of extensions, with no error message.

Checking it works

1. Go to Google and search for **covid vaccine**.
2. A small card should appear above the results, showing a topic and a 'match' percentage.
3. Feel free to try a few more, such as **keto** or **donald trump**.

If the card does not appear

- Add **&udm=14** to the end of the results page address and reload. This forces Google's classic results layout, which the card works best with.
- If it is your first search in a while, the server can take twenty or thirty seconds to wake up. Please try once more.
- Check that you are on a Google results page rather than another search engine.
- Please do not worry about the wording of the questions on the card yet. Those are placeholders while we finish writing the real ones.

That is everything you need to do. If it works, wonderful. If not, there is no need to troubleshoot on your own; we will sort it out together when we meet.
